OFFICE OF THE PROVOST

### Report of the Provost's Advisory Committee on Diversity and Inclusion

#### Introduction

Universities and communities across the country are recognizing the pressing need for individuals to look within themselves to address their own biases. At Purdue, we have heard the voices of students, faculty, and staff who have described experiences of isolation, silent and overt ostracism, subtle but consequential bias, and outright hostility. The Office of the Provost is strongly committed to diversity and inclusion and formed the Advisory Committee on Diversity and Inclusion (ACDI) in Fall 2015 to help chart a course forward for the areas that report to the Provost.

The areas of action identified by the ACDI will serve to educate the Purdue community about diversity and inclusion, provide tools for greater knowledge, skills, and awareness, and implement transformative practices relevant to diversity, sensitivity, and inclusion. The ACDI also is suggesting new standards of accountability and assessment to capitalize on strengths and address weaknesses. If widely embraced and persistent, these efforts and the core values they represent – innovation in a changing world, democratization of education and broadening participation, and social justice – will enhance the success and well-being of faculty, staff, and students.

#### Background

A committee of 30 members, including faculty, staff, and students, who were charged with identifying and metrics to enhance diversity and inclusion at Purdue. The full committee was formed in January 2016 and met once a month and subcommittees met more frequently. The committee was charged with identifying metrics to address: (1) recruitment, (2) retention, and (3) climate. From the committee's initial work, several campus constituencies met more frequently. The committee has included many additional suggestions for comments and input, providing time for thoughtful unit-level plans to be developed. The committee's goals, as a living document, intended to roll out in 2017, are to enhance recruitment, retention, and climate for undergraduate students, faculty, staff, and the report will evolve and mature, leading to an ongoing process of improvement. The report will provide a framework for the campus to track progress regarding metrics over the next five years. The metrics were identified by the ACDI:
